SUMMARY

Informatics fresh graduate from Universitas Ahmad Dahlan with strong expertise in Software Engineering, Cloud Computing, and Artificial Intelligence. Bangkit Academy 2024 Cloud Computing graduate with hands-on experience developing scalable backend systems and deploying cloud applications using Google Cloud Platform (GCP). Experienced in building AI-powered recommendation systems using Natural Language Processing (NLP), Machine Learning, and RESTful API development. Passionate about delivering reliable, secure, and efficient software solutions while continuously learning new technologies and solving real-world business challenges.

EXPERIENCE

Software Developer (Personal Project)

02/2024 - 02/2024

Desktop Cashier System

Tech Stack

- C++

Description

- Developed a desktop cashier application using C++.
- Implemented transaction management and cashier operation features.
- Applied object-oriented programming concepts in desktop application development.

Built independently as a personal project to strengthen software development skills.

Mobile Developer

10/2024 - 11/2024

LongoMate – Interactive Language Learning Application

Tech Stack

- Kotlin, Android Studio, Firebase

Description

- Developed an interactive Android-based language learning application using Kotlin.
- Implemented bilingual dictionary functionality.
- Built speaking, writing, and listening learning modules.
- Developed a gamification-based point system to improve user engagement.

Collaborated with team members throughout the mobile application development lifecycle.

Backend Developer

03/2024 - 06/2024

ConstMG – Construction Management System

Tech Stack

- Laravel, PHP, MySQL, JavaScript

Description

- Developed backend modules for a construction management system.
- Designed RESTful APIs to support frontend integration.
- Managed database design and backend functionality using Laravel.
- Collaborated with a real client to gather requirements and deliver the system.

Built as part of the Information Technology Project Management course.

AI Engineer • NLP Engineer • Backend Developer

09/2025 - 04/2026

Educational Video Recommendation Plugin for LMS Moodle

Tech Stack

- Python, Flask, REST API, FastText, IndoBERT, MongoDB, YouTube Data API, Moodle Plugin

Description

- Developed an AI-powered Moodle plugin that recommends educational YouTube videos based on curriculum topics and comment analysis.
- Built RESTful APIs using Flask for Moodle integration.
- Developed an NLP pipeline including text preprocessing, FastText embedding, and semantic similarity.
- Implemented sentiment analysis using IndoBERT to evaluate educational quality from YouTube comments.

Designed a hybrid recommendation system by combining topic relevance, sentiment quality, and popularity.

Cloud Computing Cohort (Bangkit Academy 2024)

09/2024 - 01/2025

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka ↗

Position

- Cloud Computing Cohort | Backend Developer • QA Engineer

Tech Stack

- Node.js, REST API, Google Cloud Platform (GCP), Git

Description

- Developed RESTful APIs for the WizzMate capstone project using Node.js.
- Designed and implemented scalable backend services.
- Conducted Quality Engineering (QE) testing to ensure application reliability.
- Deployed cloud-based applications using Google Cloud Platform (GCP).

Collaborated with multidisciplinary teams following Agile development practices.

Full Stack Developer

05/2023 - Present

PT Murgung ↗

Position

- Full Stack Web Developer

Tech Stack

- Laravel, PHP, JavaScript, MySQL, GPS Location

Description

- Developed a company profile website tailored to business requirements.
- Built an employee attendance system with GPS-based location tracking.
- Developed payroll management functionality for employee administration.
- Designed and maintained backend services using Laravel.

Collaborated directly with clients to gather requirements and deliver solutions.

EDUCATION

Informatics Engineering ↗

09/2022 - 08/2026

Universitas Ahmad Dahlan - Bachelor's Degree

IPK/GPA 3.59

Relevant Coursework

- Software Engineering
- Software Analysis & Design
- Artificial Intelligence

- Natural Language Processing
- Data Mining
- Database Systems
- Operating Systems
- Computer Networks
- Computer Security
- Web Engineering

CERTIFICATES

Bangkit Academy 2024 (Cloud Computing Cohort)—a program led by Google, Tokopedia, Gojek, & Traveloka	09/2024 - Present
Menjadi Google Cloud Engineer	11/2024 - 11/2027
Belajar Membuat Aplikasi Back-End untuk Pemula dengan Google Cloud	11/2024 - 11/2027
Belajar Dasar AI	10/2024 - 10/2027
Belajar Dasar Pemrograman JavaScript	10/2024 - 10/2027
Belajar Dasar Pemrograman Web	09/2024 - 09/2027
Belajar Dasar Git dengan GitHub	09/2024 - 09/2027
Pengenalan ke Logika Pemrograman (Programming Logic 101)	09/2024 - 09/2027
Memulai Dasar Pemrograman untuk Menjadi Pengembang Software	09/2024 - 09/2027

SKILLS

REST API	Advanced	Google Cloud Platform (GCP)	Advanced
Recommendation System	Advanced	Node.js	Advanced
Artificial Intelligence	Advanced	REST API Development	Advanced
Computer Security	Advanced	JavaScript	Advanced
Operating Systems	Advanced	Natural Language Processing (NLP)	Advanced
Cloud Computing	Advanced	System Analysis	Advanced
Content-Based Recommendation System	Advanced	Database Management	Advanced
FastText	Advanced	Software Engineering	Intermediate
Python	Advanced		

LANGUAGES

Indonesian	Native	Japan	Basic
English	Fluent
